

Make a bracket for the solar panel

Overview

This step is as easy as it gets. You can find your optimal tilt angle instantly by using our solar panel tilt angle calculator. (Or browse our list of solar.

My dad is an engineer, so I got his input on this design. We came up with something easy and sturdy. It's not perfect, but here's what we did: The wall mount I built is essentially.

Assemble your triangle on the ground again using the two cut sides. For the third side, use the remaining length of wood you have. Mark where you want to cut the third side of the triangle.

You could use the good ol' Pythagorean theorem to figure out the length of the other sides of the triangle. But here's a simple way to do it without math.

Make a bracket for the solar panel

RENOGY Adjustable Solar Panel Tilt Mount Brackets support up ...

The mounting holes on my solar panel were a little too small for the bolts supplied in the kit, therefore i had to make the holes on the panel frame very slightly larger. I fitted this to a 200w ...
