

# Make a simple solar power generator

## Overview

---

Can you build a DIY solar generator?

One of its primary features is its scalability — from the smallest solar panel for domestic use to large solar fields that can power a city. Solar components are modular and safe to handle, making it possible for anyone to build a DIY solar generator. In this article, we guide you step-by-step through building your DIY portable solar generator.

What is a DIY portable solar generator?

More About [opengreenenergy](#) » A DIY portable solar generator is an excellent project for individuals who want to harness the power of the sun while also having a reliable source of electricity on the go. You can easily make your portable solar generator with a little knowledge and some basic tools.

What do I need for a DIY solar battery generator?

For a DIY solar battery generator for RV use you'd need at least a 500W AC inverter and a 2,700Wh battery. [What Parts Do You Need?](#)

I'll cover the components in-depth in the next section, but let's just quickly run through the parts and consumables you'll need: [DIY Solar Generator Parts: Consumable Materials:](#).

How to design a solar generator?

The first step in designing the solar generator is estimating your energy needs. To estimate the energy consumption for the desired devices, we can use the formula: Energy (in watt-hours) = Power (in watts) x Time (in hours) Let's calculate the energy consumption for each device: 6W LED for 6 hours: Energy = 6W x 6h = 36 Wh.

Can you build a solar generator from the ground up?

If the process of building a solar generator from the ground up — including

wiring all the components, buying compatible hardware, and testing everything — sounds too complicated, you can still create a DIY setup, but in fewer steps. All you need to do is purchase a portable power station and portable solar panels.

How much does a DIY solar generator cost?

So let's talk about what the main components may set you back. Building a DIY solar generator may cost you anywhere between \$1,600 and \$2,400. The main variable is the battery type. If you're on a budget, by all means, go with a good-old lead-acid battery. Finally, before you start, make sure to create a DIY solar generator wiring diagram.
