

# **Manual energy storage device in power distribution cabinet**

## Overview

---

What is integrated energy storage system?

**Product Description** **Product Introduction** The integrated energy storage system consists of an energy storage converter system and an energy storage battery system. The system is mainly applied in industrial and commercial scenarios. The energy storage converter system integrates PCS and system power distribution.

What is a battery energy storage system?

**Battery energy storage system (BESS):** Consists of Power Conversion Equipment (PCE), battery system(s) and isolation and protection devices.  
**Battery system:** System comprising one or more cells, modules or batteries.  
**Pre-assembled battery system:** System comprising one or more cells, modules or battery systems, and/or auxiliary equipment.

What are the customer requirements for a battery energy storage system?

Any customer obligations required for the battery energy storage system to be installed/operated such as maintaining an internet connection for remote monitoring of system performance or ensuring unobstructed access to the battery energy storage system for emergency situations. A copy of the product brochure/data sheet.

How can a battery energy storage system reduce reliability on the grid?

**Reduce reliability on the grid:** When the battery energy storage system is fully charged, how many loads can be supplied by the energy storage system when it is fully charged for a set period of time.

What equipment do I need to install a battery energy storage system?

Any bollards required to be installed in front of battery energy storage system.  
Safety exclusion zone around battery energy storage system if required.  
Location of main switchboard. Any other existing NET on site.

Can a battery energy storage system be installed in Australia?

Any upgrades to existing site electrical infrastructure required to install proposed battery energy storage system. All components of the system should be suitable for installation under Australian legislation and Standards.

## Manual energy storage device in power distribution cabinet

### Energy Storage System

CATL's energy storage systems provide users with a peak-valley electricity price arbitrage mode and stable power quality management. CATL's electrochemical energy storage products have ...

- Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 100% Peak Output Power
  - 2 MPPT Trackers, 100% DC Input Overvoltage
  - Max. PV Input Current 55A, Compatible with High-Power Modules
- Intelligent Simple O&M**
  - IP66 Protection Degree: support outdoor installation
  - Smart ITC Error Diagnostic Function: locate PV string faults accurately and automatically detect faults
  - DC & AC Type-II SPD: prevent lightning damage
  - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
  - Plug & Play, EPC Switching Under 10min
  - Compatible with Lead-acid and Lithium Batteries
  - Max. 6 Units Inverters Parallel
  - AFC Function (Optional): when an arc fault is detected the inverter immediately stops operation
