

# Maryland energy storage incentives

## Overview

---

As a Maryland taxpayer, you can claim up to 30 percent of the cost of your energy storage system as a credit towards your state income taxes. The state caps the credit at \$5,000 for residential systems, enough to cover about one-third of the average cost of a home battery system. Does Maryland offer a tax credit for energy storage systems?

That's good news. Maryland has become the first state in the country to offer an income tax credit for energy storage systems, making going green even cheaper for homeowners! Residents who purchase and install energy storage systems can earn up to \$5,000 in state income tax credit.

What is the Maryland energy storage program?

encourage the deployment of energy storage systems in Maryland.<sup>1</sup> The Program is available to residential and commercial taxpayers who have installed an energy storage system on their residential or commercial property in Maryland during Tax Year 2021 (January 1 - December 31, 2021). Under the enabling statute, MEA may award.

How much is Maryland battery storage tax credit worth?

Maryland's Energy Storage Income Tax Credit is worth 30% of the cost of a battery project or \$5,000 — whichever is less. So, if you buy 10 kWh of battery storage for \$10,000, the credit would be worth \$3,000. If you buy 20 kWh of battery storage for \$20,000, the credit would be worth \$5,000 because that's the maximum value.

How can I reduce the cost of battery storage in Maryland?

In Maryland, there are two incentives that can significantly reduce the cost of battery storage. First, there's the Residential Clean Energy Credit through the federal government. This is the same as the solar tax credit mentioned above, and it's worth 30% of the cost of battery storage, whether or not it's attached to a solar system.

Does Maryland have a solar investment tax credit?

In August, the Inflation Reduction Act (IRA) increased the federal solar investment tax credit (ITC) from 30% for the next ten years. That's good news. Maryland has become the first state in the country to offer an income tax credit for energy storage systems, making going green even cheaper for homeowners!.

How much is a storage credit in Maryland?

Commercial properties that install larger storage systems can claim a credit of up to \$150,000. Funding is limited for this incentive: MD can provide up to \$750,000 in tax credits each year, and the credits are awarded to eligible participants on a first-come, first-served basis.

### Solar Battery Incentives and Rebates

The best incentive for storage is the federal investment tax credit (ITC). The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions. Due to the Inflation Reduction Act, as of 2023, all residential storage systems over 3 kilowatt-hours (kWh) in size are eligible for the ITC.
