

Megger pvk320 photovoltaic kit with multimeter

Overview

What is a Megger pvk350 solar test kit?

The Megger PVK350 PV test kit designed for the testing of solar (PV) installations. The PVK350 photovoltaic kit offers essential tools for solar professionals. Included is the Megger DCM1500s solar clamp meter, PVM210 irradiance meter, and specialised solar test leads, neatly organised in a durable hard case.

What is a Megger photovoltaic kit?

Paired with a multimeter or clamp meter, Megger's Photovoltaic Kits (PVK320, PVK330) are perfect for installing, commissioning, and testing solar installations – enabling electricians or engineers to verify the stated short circuit current.

What is the Megger pvk330 photovoltaic kit?

The PVK330 photovoltaic kit offers additional functionality for the he Megger MFT1730 and MFT1835 multifunction testers using three key components: To provide easy storage of the PV kit, a zipped pouch is also included.

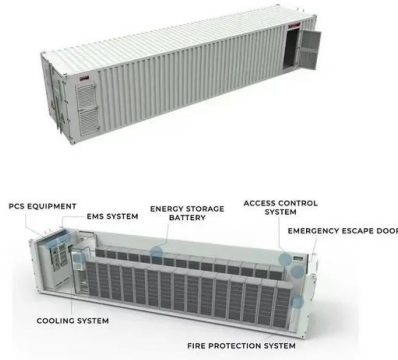

What is a pvm210 kit?

This special bundle pack is made for use by photovoltaic (PV) installers and includes all of the tools needed for accurately installing, commissioning and maintaining PV systems. What's In The Kit?

Compact and pocket-sized, the PVM210 is the quick and easy way to measure solar power.

Megger pvk320 photovoltaic kit with multimeter

Megger Pvk320 Pvm210/Avo410/Set of PV Test Leads + Pouch Photovoltaic

The Megger PVK320 photovoltaic kit offers this additional instrumentation in the form of a PVM210 irradiance meter, a CATIV 10 A dc AVO410 multimeter and a kit of specialist solar test leads. To provide easy storage of the PV kit a zipped pouch is also included.
