How the Midwest Can Advance the Future of Renewable Energy

California might be leading the charge for renewable energy, but that alone isn't enough spite a 46-fold increase in solar generation from 2008 to 2018, fossil fuels still make up 80% of the energy consumed in the U.S. About 77% of Americans think the nation should invest more in alternative energy sources, which is why energy leaders would be wise to look to the ...
