## Overview

---

What is the mysunpower app?

By integrating seamlessly with your SunPower® solar and battery storage solutions, the mySunPower app puts the power to monitor system performance and control battery settings in the palm of your hand. The app is an extension of the mySunPower web portal and is currently available to SunPower Equinox® customers.

How do I access mysunpower web?

Log on to mySunPower Web through your desktop or tablet for a landscape view and see your energy, power, system information, savings and more all in one easy-to-read dashboard.

How does mysunpower work?

Throughout the app, graphs offer initial information at a glance, while more in-depth information will reveal itself with a tap or a swipe. mySunPower was built with the connected home in mind. For SunPower homeowners with production meters, energy data displays live in the app while connected via WiFi.

What if I Forgot my SunPower password?

Need Help?

Can't remember the email you use to sign in?

Try signing in with the email you used to communicate with SunPower or your dealer. If you can't remember that email, please contact SunPower.

What is the new SunPower monitoring app?

The new monitoring app builds on the existing mySunPower digital experience. Homeowners can now see their lease/sales proposals in mySunPower, upon deciding their preference for financing and agreeing to a system structure that best meets their needs, they can sign their initial agreement with SunPower in the application.

What if I can't remember my SunPower email?

Try signing in with the email you used to communicate with SunPower or your dealer. If you can't remember that email, please contact SunPower. Can't remember your password?

### The New mySunPower® Monitoring App , SunPower Solar Blog

In making the mySunPower app, SunPower rethought everything from the login screen to how power and energy are summarized throughout the year. The new interface is deceptively simple. Upon first logging in, users can view the basic status of their system including energy production, consumption and battery flow, depending on their setup.
