

# **New wind tower project**

## Overview

---

Where will UK's largest wind turbine factory be built?

The UK's largest factory for making steel towers for offshore wind turbines looks set to be built in the Highlands. The £110m facility has been proposed for Port of Nigg on the Cromarty Firth. Inverness-headquartered Global Energy Group, which owns the port, and Spanish company Haizea Wind Group are behind the plans.

Will China build the world's largest offshore wind turbine?

China's Ming Yang Smart Energy Group has announced its plans to build the world's largest offshore wind turbine, with blades that can reach almost the height of the Eiffel Tower in Paris.

How will the UK's new wind turbine development funding work?

The funding will help expand and upgrade its testing facilities and enable the evolution of the next generation of wind turbines in the UK. The late-stage research and development facilities will be designed for the testing of blades up to 150 metres and drive trains up to 23 megawatts (MW).

What is the world's largest offshore wind farm under construction?

The world's largest offshore wind farm under construction has produced its first power. Dogger Bank wind farm, located in the North Sea off the UK's Yorkshire coast, has installed the first of a planned 277 turbines. As of 7 October, it is connected to the UK's national grid and is providing renewable power to homes and businesses.

Will the UK be at the forefront of Technology Development in offshore wind?

Ambitious plans to keep the UK at the forefront of technology development in offshore wind have been given the green light today (14 May 2024). UK Research and Innovation (UKRI) will provide £85.6 million of capital funding for the Offshore Renewable Energy (ORE) Catapult.

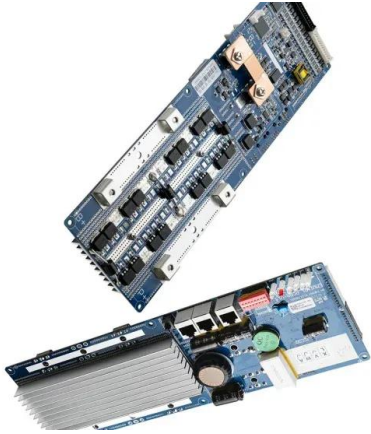

Can a wind turbine power a home for 2 days?

A single rotation of this wind turbine - twice as tall as the London Eye - can power a home for two days. The world's largest offshore wind farm under construction has produced its first power. Dogger Bank wind farm, located in the North Sea off the UK's Yorkshire coast, has installed the first of a planned 277 turbines.
