Overview

Do I need a permit to install solar panels in NYC?

It is highly recommended to use this guide in conjunction with the NYC Solar Standardized Checklist of Filing Materials. NYC requires both a construction and an electrical work permit to perform a solar PV installation. A plumbing work permit is required on solar thermal projects in lieu of the electrical permit.

Can solar energy save New York City?

Solar technologies can capture a reliable, renewable source of energy that reduces demand on New York City's electrical grid and reliance on other fuel sources. Solar panels can generate electricity, capture and store thermal energy, and they may even take the place of more conventional building materials.

How do I get a solar permit in NYC?

All solar electric (photovoltaic or PV) projects must file for an ED16A Form: Electrical Permit Application, which may be filed online, in person by a licensed NYC Master Electrician, or by mail. All solar hot water (thermal) projects must file for a Plumbing Permit.

Are solar panels allowed in New York City?

FDNY has set restrictions to solar arrays in the 5 boroughs of NYC under NYC Fire Code Chapter 5 Section 504 & 512. Buildings under 100 feet tall with a roof slope 20 degrees and under must provide a 6 foot wide and 9 feet tall clear path from front to back and side to side.

Can a solar project be filed as a new building or alteration permit?

Projects may be filed as part of another New Building or Alteration permit application if other construction work is happening at the same time on the property except when applying for the Solar Property Tax Abatement (PTA).

(NYC currently offers a 20% PTA to building owners for installing solar PV systems.

Do I need a permit to install solar energy?

Permits are required for the installation of all building-connected solar energy systems. There are several options for filing solar energy projects at the Department of Buildings. Projects may be filed as part of another New Building or Alteration permit application.
