

# **Off grid solar storage project financing options in Libya 2025**

## Overview

---

Public Investment Fund (PIF): Key investor in localization and mega solar projects. Private Sector Participation (PSP) Law (2021): Encourages public-private partnerships (PPPs). Investment Law (2025): Levels the playing field for foreign investors. Will GECOL build a solar plant in Libya?

A recent MOU between UAE-based Alpha Dhabi Holding and GECOL aims to construct two additional solar plants in Libya, with a target capacity of 2 GW. Notably, Libya's vision for its renewable energy sector transcends its borders and aims to capitalize on its strategic position as the North African gateway to Europe.

How much solar power does Libya have?

In terms of solar power potential, Libya boasts approximately 3,200 annual brightness hours and an average radiation of 6 KWh per m<sup>2</sup> per day. For reference, each km<sup>2</sup> of desert in the country receives solar energy equivalent to 1.5 million barrels of crude oil annually.

What is real doing to increase national grid capacity?

Anticipating a surge in energy requirements, the Renewable Energy Authority of Libya (REAoL) has launched several ambitious projects to grow national grid capacity. Focus has predominantly centered on solar projects, such as the 50 MW Bani Walid Solar PV Park, which is set to begin construction in 2024 and commercial operation in 2025.

Which solar projects are being built in Tajura & Kufra?

Focus has predominantly centered on solar projects, such as the 50 MW Bani Walid Solar PV Park, which is set to begin construction in 2024 and commercial operation in 2025. A 115 MW solar power plant in Tajura and a 100 MW solar power plant in Kufra are also in the construction phase.
