Overview

What should a property owner know before installing a solar system?

The following guidance is intended to help property owners and those involved in managing, maintaining, or making changes to historic buildings understand the issues to be considered when designing and installing solar power systems. Before installing a PV system, it is important to understand the electrical energy needs of the building users.

How many solar panel installers are there in the UK?

There are over 4,000 registered solar panel installers in the UK – credit Solar Fast With over 4,000 registered installers in the UK in 2024, finding the right installer for your project can be hard work, especially on top of the cost of solar panels in the UK in 2024. So we're here to help.

Do I need a building regulation application for solar panels?

You may be required to submit a Building Regulation application for certain structural aspects of solar installations. Speak to your local authority building control surveyor for guidance. Property owners across England and Wales are increasingly investing in photovoltaic and solar thermal collector panels to lower their energy costs.

What should I know before installing a PV system?

Before installing a PV system, it is important to understand the electrical energy needs of the building users. Our Energy Efficiency pages provide guidance on how to improve energy efficiency. Reducing your overall energy demand will maximise the proportion that can be provided by the PV system, saving money and carbon dioxide emissions.

Can an MCS-Accredited Installer certify a second-hand solar panel installation?

An MCS-accredited installer can not certify a second-hand solar panel installation which is essential to receive payments using the Smart Export

Guarantee. Certification is also necessary for some other types of funding and insurance coverage.

Does solar fast use 440w dmegc panels?

The company is a solar specialist, as its name suggests, and it uses highly efficient and powerful 440W DMEGC panels. However, Solar Fast will also supply and fit solar storage batteries, EV chargers and “IBoost” immersion controllers to help you manage your heating.
