

Opex solar companies india

Overview

Why should you invest in solar OPEX company in India?

Investing in Solar Opex Company in India opens the benefits of sustainable energy and aligns with the economic imperatives of a greener, more resilient future. As a leading Solar Opex Company in India Oriana Power is delivering cost-effective solar solutions. Harness solar energy efficiently for your business's success.

Should you choose OPEX or CAPEX solar companies in India?

With OPEX solar companies in India, you're locked into a fixed-rate agreement, providing stability. But with CAPEX, you're more exposed to market fluctuations, which could impact your savings over time. Ultimately, the right model depends on your unique circumstances, preferences, and long-term goals.

What is OPEX model?

In 2012, CleanMax pioneered and introduced the "OPEX Model" through distributed solar solutions in India. This model is also known as ' RESCO ' model . Today we also have a network of private offsite renewable energy farms across India, through which we supply large corporates with clean energy as per their needs.

Are OPEX solar systems worth it?

Potential for Higher Costs: While OPEX solar models often tout lower initial costs, over the long term, you might end up paying more over owning the system outright. It's essential to crunch the numbers and consider your financial goals before committing.

How to understand solar OPEX?

Solar OPEX is a financial strategy revolutionising how solar projects are financed and managed. Unlike CAPEX, which requires a significant upfront

expenditure, OPEX allows businesses to receive solar energy without incurring significant upfront costs.

What is OPEX & how does it work?

OPEX shifts operational and performance risks to the Solar Opex Company in India. This lessens the financial strain on businesses, making solar energy investments more safe and predictable. Because of the flexibility of OPEX, businesses can scale their solar energy use as their activities expand.

Opex solar companies india

Solar OPEX/RESCO

Our OPEX solar energy solutions are in a pay-as-you-go model, by which corporates pay for solar electricity at a rate lower than grid tariffs - in fact, up to 20-40% cheaper. There is zero investment, no capex and the user does not take on any of the performance risk of the plant.

OPEX model takes hold in India but faces a key challenge

India has added 513 MW of rooftop solar capacity over the past 12 months reaching total installed capacity of 1,020 MW. 22% of capacity addition in the last year has been built under OPEX model where a third party project developer finances and installs the system on rooftop owner/consumer's premises and sells all power output to him under a long-term ...
