[Power Control System Setup \(PCS\)](#)

The Power Control System feature in Solargraf is designed to enable Inverter manufacturers to control the amount of power (current) flowing through the renewable energy system (PV/ESS). It helps avoid costly upgrades, oversize systems within jurisdiction limitations, and reduce labor

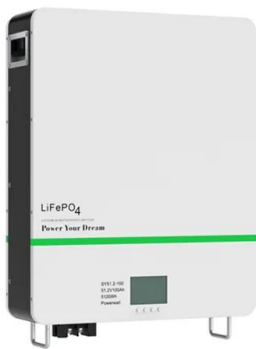

effort/cost of the systems.

Power Control Systems (PCS) for Enphase Storage

Power Control Systems course explains the objective and the use cases. It identifies the components for Enphase PCS and the location of CTs (Current transformers) for PCS. It explains how the import only mode avoids installation of NGOM meter and how PCS software avoids the main panel upgrade and explain how to configure MPU Avoidance using the ITK.

Power Control Systems

About Company PCS is a leading brand name, offering full spectrum power conditioning product range. PCS with its state of art production facility manufactures On Line and Off-Line UPS, using latest IGBT/ MIROCONTROLLER based Technology. We manufacture
