

Photovoltaic Panel Deposit Agreement

Overview

What is a solar power purchase agreement (PPA)?

Home » Solar Power Purchase Agreement (PPA) Explained: A Comprehensive Guide In the dynamic landscape of renewable energy, the Solar Power Purchase Agreement (PPA) has emerged as a game-changer, offering individuals and businesses a pathway to harness solar power without the burden of upfront costs.

How long is a solar PPA contract?

The term of a solar PPA is typically 25 years. The developer is responsible for the operation and maintenance of the system for the duration of the agreement. At the end of the PPA contract term, a customer may be able to extend the PPA, have the developer remove the system or choose to buy the system from the developer.

What is a power purchase agreement (PPA)?

A Power Purchase Agreement (PPA) refers to a contractual agreement between two parties, typically a power producer and a customer. The producer usually arranges the design, gains the necessary permissions and manages the installation of a solar PV system on the customer's property at little to no cost.

How does a solar PPA work?

Reduced energy costs, with known inflation rates: Solar PPAs provide a fixed, predictable cost of electricity for the duration of the agreement. The fixed cost per kWh paid for solar energy typically inflates either at a known fixed rate, or at the rate of RPI. Both inflation rates are below expected electricity price inflation.

Should you invest in a solar PPA?

Even with significant electricity savings, it would take years for a business to

recover the initial investment if they were funding a solar purchase themselves. Another notable advantage of a PPA is that you won't have to worry about maintaining the solar panels.

How long does a solar PPA last?

In exchange, the customer, known as the host, receives discounted energy prices below the utility rate. Solar PPAs are usually in place for upwards of 10 years, with some contracts surpassing 30 years. Solar PPAs aren't quite as popular as previously because owning a solar system has become more affordable.
