

Photovoltaic bracket aluminum rail packaging specifications

Overview

What is a power rail PV module mounting system?

The PV module mounting system engineered to reduce installation costs and provide maximum strength for parallel-to-roof, tilt up, or open structure mounting applications. The POWER RAIL mounting system is designed with the professional PV solar installer in mind.

What types of rails are suitable for a photovoltaic system?

Suitable for different load cases and many ranges of spans inclusive extensive range of rails. The SolidRail mounting system for photovoltaic assemblies is suitable for nearly all coverings. This includes pan tiles, plain tiles, slate tiles, trapezoidal sheet metal, corrugated fibre cement, corrugated sheet metal and standing seam roof.

What is a railless PV system?

The variety of system combinations like L-foot, fixed foot or PV module clamp directly, allows it to be connected quickly to all rail components. railless system facilitates the rapid mounting of framed PV modules on trapezoidal metal sheet roofs with minimum thickness 0.8 mm.

What is a standard solarmount® rail?

Standard SolarMount® Standard rail gives you ultimate flexibility, including bottom mounting and tilt-up options. SolarMount® Light In flush mounted arrays, easy handling SolarMount® Light rail saves aluminum and expense without compromising structural integrity. PV's most versatile mounting system.

What types of roofs can a solidrail mount a photovoltaic system fit?

The SolidRail mounting system for photovoltaic assemblies is suitable for nearly all coverings. This includes pan tiles, plain tiles, slate tiles, trapezoidal sheet metal, corrugated fibre cement, corrugated sheet metal and standing

seam roof. We offer roof hooks for almost all clay tiles, pantiles, plain tiles and concrete roof tiles.

What is a power rail mounting system?

The POWER RAIL mounting system is designed with the professional PV solar installer in mind. The top-clamping rails utilize a single tool with a revolutionary patented RADTM Fastener for faster bolt placement. The unique shape of the RAD provides an anti-rotation feature, locking the bolt in the proper orientation when installed.
