How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 – £1,500 whereas polycrystalline solar panels cost about £900 per kW.

How much does a 3.5 kWp solar panel system cost?

A 3.5 kWp solar panel system would typically require around 10 solar panels (at 350 W each) and cost between £5,000 and £10,000. \*kWp stands for 'kilowatt peak'. This is the amount of power that a solar panel or array will produce per hour in prime conditions.

How much does a solar panel cost in the UK?

The average cost of a solar panel in the UK based on a 350-watt panel is currently between £500 and £800. However, please bear in mind that this is the price for a single solar panel and does not include the professional installation or any other extras e.g. pigeon proofing. With that said, let's explore some common solar installation scenarios.

What costs should you consider before installing solar panels?

There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

How much does a solar PV system cost?

Here we have assumed each panel is 430 Watts, and can produce roughly 345kWh of energy per year. Basing our analysis of real-life pricing in 2024, we found that a system with 12 PV panels would cost around £6,900, and prices go up and down from there depending on the panel count.

What is a solar panel cost calculator?

The solar panel cost calculator below will help you determine how much energy you can save, as well as the financial rewards you could potentially earn by installing a solar panel array on your property. Please bear in mind that the calculator will provide estimates based on the information you have provided.
