

# **Photovoltaic bracket four-head bevel cutting machine**

## Overview

---

What are orbitalum saw blade bevel cutters made of?

The machine head as well as the self-centering vice are manufactured of high quality aluminum alloys, which fulfill the highest construction site requirements. \* Only with the Orbitalum saw blade bevel cutter combinations, Code 790 044 046 or Code 790 044 047. Especially suitable for pipes of metal press fitting systems.

How does a pipe cutting & beveling machine work?

Pipe cutting and beveling machines with manual feeding module MVM\*: An add-on module at the machine makes it easier to machine pipes through a manually operated handwheel. This ensures that the machine head rotates easily around the pipe user-friendly with little effort and constant feed. Saw blade (Code 790 . ).

What is planetary cutting & beveling?

Cutting and beveling in seconds of pipes made of high-alloyed steel (special steel), low-alloyed and unalloyed steel, cast materials, plastics and non-ferrous metals according to the procedure of the "planetary cutting".  
"Increased safety through standing pipe - rotating tool".

How a solar cell cutting machine works?

The machine is very stable, utilizes very low electricity, and automatically processes the solar cell metal chips which have made it possible to have an uninterrupted production flow. The Solar Cell Cutting machine executes the operation in the fluidic way and allow the cells to get perfectly cut at exactly required measurements.

How a solar cell cutting machine has changed the production industry?

Automation in the Solar cell cutting machine has changed the scenario of the production industry. The machine is very stable, utilizes very low electricity,

and automatically processes the solar cell metal chips which have made it possible to have an uninterrupted production flow.

How many ring for a saw blade bevel cutter?

We recommend using 1 ring for the saw blade bevel cutter combinations. Consisting of one saw blade and one bevel cutter each. Especially suitable for pipes of metal press fitting systems. Individual parts can also be ordered separately. VERSION PIPE WALL THICK- BEV- BEVELING SAW BLADE Ø CODE KG NESS ELING HEIGHT MAX.
