## Overview

---

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

Why do solar panels need a mounting system?

Mounting systems are essential for the appropriate design and function of a solar photovoltaic system. They provide the structural support needed to sustain solar panels at the optimum tilt, and can even affect the overall temperature of the system. Based on the selection of the solar mounting structure, the cooling mechanism will be different.

What is the installation phase of a photovoltaic system?

The installation phase of photovoltaic (PV) systems is a critical step that involves several key activities to ensure the system operates effectively and safely. Here's a more detailed look at what this phase entails:

Why should you install a photovoltaic system?

Installing photovoltaic (PV) systems is a key stride toward embracing renewable energy, which is crucial for reducing carbon footprints and fostering sustainable energy use. Starting with a detailed site assessment to evaluate solar potential and optimal setup, the process ensures efficiency and compliance from the get-go.

How do I connect a PV system to the grid?

Grid Interconnection Application: Before connecting a PV system to the grid, an application must be submitted to the local utility company. This application includes detailed specifications of the PV system, such as its capacity, the type of inverter used, and the configuration of the solar array.

How do I choose a solar racking system?

The choice of racking depends on several factors, including roof integrity, space, orientation, and exposure to sunlight. The mounting structure must be strong enough to support the solar array for decades and withstand environmental factors such as wind and snow loads.
