## Overview

---

The photovoltaic (PV) bracket industrial chain comprises upstream, midstream, and downstream sectors, each playing a crucial role in the production and distribution of solar mounting systems. What was the global PV production capacity in 2023?

Accessed March 21, 2024 ; EIA “Annual Energy Outlook 2023.” Accessed March 21, 2024. At the end of 2023, global PV manufacturing capacity was between 650 and 750 GW. 30%-40% of polysilicon, cell, and module manufacturing capacity came online in 2023. In 2023, global PV production was between 400 and 500 GW.

What percentage of PV production came online in 2023?

30%-40% of polysilicon, cell, and module manufacturing capacity came online in 2023. In 2023, global PV production was between 400 and 500 GW. While non-Chinese manufacturing has grown, most new capacity continues to come from China. Analysts project that it may take years for production to catch up with capacity.

What is a snapshot of global PV markets?

This 11th edition of the “Snapshot of Global PV Markets” aims at providing preliminary information on how the PV market developed in 2022. The 28th edition of the PVPS complete “Trends in Photovoltaic Applications” report will be published in Q4 2023.

What is the IEA photovoltaic power systems programme?

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCPs within the IEA and was established in 1993. The mission of the programme is to “enhance the international collaborative efforts which facilitate the role of photovoltaic solar energy as a cornerstone in the transition to sustainable energy systems.”.

How many residential PV systems are there in the United States?

At the end of 2023, SEIA estimates there were nearly 5 million residential PV systems in the United States. 3.3% of households own or lease a PV system (or 5.3% of households living in single-family detached structures). Sources: U.S. Energy Information Administration, “Electric Power Monthly,” forms EIA-023, EIA-826, and EIA-861.

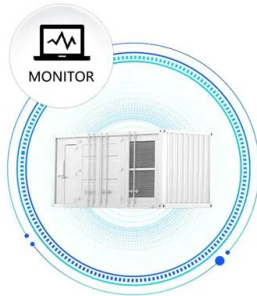

What is the global PV trade based on?

The data on global PV trade used in this paper comes from the BACI-CEPII 2 Database, covering 251 global economies from 1996 to 2019. According to the division of the PV industry, the upstream is composed of crystalline silicon raw materials and the preparation of silicon rods and silicon wafers.
