

# **Photovoltaic cement pier bracket installation diagram**

## Overview

---

How is a ground mounted PV solar panel Foundation designed?

This case study focuses on the design of a ground mounted PV solar panel foundation using the engineering software program spMats. The selected solar panel is known as Top-of-Pole Mount (TPM), where it is designed to install quickly and provide a secure mounting structure for PV modules on a single pole.

How to install solar stack pedestals?

Solar Stack pedestals can be installed on different types of roofs: Tile, Modified Bitumen, TPO, Concrete etc. Roof must be cleaned with brush. Place, where the Solar Stack pedestals and solar panels are to be placed on the roof must be clean, dry and at.

Do I need a primer before installing solar stack pedestals?

Before foam adhesive and Solar Stack pedestals are installed to the roof, "primer" coating must be applied for stronger bond between the TPO roof and foam adhesive. Appropriate "primer" must be determined with the roof manufacturer to avoid warranty issues. Determine the spacing of Solar Stack pedestals for your solar array design.

How do I install a solar array on a roof?

Using your engineered design, locate the array layout on the roof, and determine mount locations. Measure and determine the spacing between the Solar Stack pedestals according to the solar array design. Mark the lines across the roof for all the mounts.

Can solar stack be installed on a concrete roof?

Solar Stack pedestals can be installed on BUR (Build Up Roof), Mineral surface (Modified Bitumen), EPDM, PVC, TPO, Hypalon and Concrete roofs. Solar Stack's innovative design incorporates a patented pedestal used in

conjunction with a code-approved adhesive.

How do I install a solar stack module?

Insert the end clamps laterally in the pedestal. The end clamps are attached and then tightened at the height of the module frame. Modules should be installed to the Solar Stack pedestals with the manufacturer approved middle/end clamps. There are different types of clamps available for the module installation.
