How do I install a solar inverter?

Switch off AC to the inverter on the main service panel. Make sure the PV voltage is lower than 30V. Toggle off the battery ON/OFF/P switch. Turn off the battery circuit breaker. Select an appropriate installation location. Position the mounting bracket against the installation surface. Mark two or more drilling spots.

How do you connect a battery to an inverter?

Inverter via DC fuse/isolator -> Battery 1, and then battery 1 -> battery 2 (with equal length cables). Not the neg loop back from the second battery to the fuse/isolator. The installer came back and insisted that this is the correct setup (or at least, is perfectly acceptable).
