

Photovoltaic combiner box fuse holder

Overview

What fuses are included in a PV DC combiner box?

The PV DC COMBINER BOX is provided with gPV fuses in accordance with IEC 60269-6:2010. Each design of combiner box contains the most suitable fuse rating specially selected for each project, depending on Isc of PV strings, on voltage rating and on ambient temperatures. Clamping range, min. / max. Wire connection cross section AWG, min. / max.

How do you disconnect a PV combiner box?

Ensure the circuit breaker is in the "OFF" or "TRIP" position (or the load isolation switch is in the "OFF" position) to disconnect the combiner box from the PV DC output side. All fuse holders inside the combiner box should be open (or remove the fuse core using specialized pliers) to disconnect the DC combiner box from the PV string input side.

What is a solar combiner box?

The combiner boxes are installed to join and protect the DC strings that go from the PV panels to the solar inverter. The PV DC COMBINER BOX product range offers solutions from 8 to 32 inputs and 1 or 2 outputs. These can be designed for systems with string voltage of 1000 or 1500 V DC.

What is a PV DC combiner box?

PV DC COMBINER BOX is a complete range of tailor-made Level 1 combiner boxes for utility-scale photovoltaic systems. The combiner boxes are installed to join and protect the DC strings that go from the PV panels to the solar inverter. The PV DC COMBINER BOX product range offers solutions from 8 to 32 inputs and 1 or 2 outputs.

What are Bussmann solar fuses?

Eaton's Bussmann series photovoltaic gPV solar fuses are specifically designed to protect DC system up to 1500 V d.c. They are suitable for the DC protection

of solar panels, combiner boxes, recombiner units and battery storage An introduction to understanding fuses and how they are applied for providing overcurrent protection.

How do I connect a DC combiner box to a solar inverter?

The output cables must be connected to a Level 2 combiner box, which will join DC+ and DC- from other Level 1 combiner boxes, or directly to the solar inverter. The enclosure of the PV DC COMBINER BOX is made of Glass Fibre Reinforced Polyester (GFRP). The enclosure provides IP65 and IK07 or higher in accordance with IEC 62208.
