Overview

What are fastensol solar panel fixings & solar panel mounting rails?

Our range of Fastensol offers premium Solar Panel Fixings & Solar Panel Mounting Rails, a cutting-edge solution for efficient solar installations. These high-quality components ensure secure panel attachment and easy alignment, maximising energy output.

How do I install a solar photovoltaic system?

The most efficient way to install a solar photovoltaic system is by using a Heliomotion. Simply because a Heliomotion has innovative sun-tracking technology that enables solar panels to track the sun throughout the day and year. The possibilities for mounting solar are endless.

How do you install solar PV on a tiled roof?

So here's our guide to trusted mounting solutions for all different roof types. To install solar PV on tiled roofs, our installers slide up the tiles to reveal the wooden roof joists underneath. A U-shaped hook screws into the joist, and the tiles slide back down over the hook - once again making the roof completely waterproof.

How do you mount a PV array on a tile roof?

The two most common approaches to mounting PV arrays on tile roofs are "standoff" posts and tile hooks. Standoff posts tend to be stronger due to their simple column loading design, while tile hooks use a cantilevered loading configuration (think diving board), which deflects under wind and snow loading.
