

Photovoltaic panel export volume ranking

POWER UP INDOORS&OUTDOORS

Overview

TrendForce has ranked the top six module manufacturers by shipment volume in 2022, with Longi topping the list, followed by Trina Solar and JinkoSolar. What is the export volume of solar PV products?

From January to November, the export volume of solar PV products hit USD 47.75 billion. Except for the top 4 manufacturers, Canadian Solar and Risen Energy have shipped over 60% of their modules overseas. The ratios have even reached 80% and 90% for Znshine Solar and DAH Solar.

Which country produces the most photovoltaic modules in 2023?

In 2023, China accounted for almost 85 percent of the global photovoltaic (PV) module production. The country representing the second-largest share of PV production was Vietnam, accounting for just 3.4 percent.

How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity – ten times more than Europe – and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

Who will dominate the global PV module market in 2023?

A total of 18 Chinese companies were selected in the top 20 list, with a total

output of more than 440GW in 2023, gradually taking over the global PV module market with their unique advantages. LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year.

Who makes the most solar panels in 2022?

JA Solar, Canadian Solar, and Risen Energy rounded out the top six, in a year dominated by large-format modules. TrendForce says in a new report that the top six module manufacturers in 2022 shipped around 205 GW to 211 GW of PV panels, accounting for 76% to 78% of 270 GW of module demand last year. All of the main manufacturers are based in China.
