

Photovoltaic panel first piece inspection record table

Overview

What is a PV inspection reference?

This inspection reference details most of the issues that relate to the PV system during the inspection process.

Do PV system commissioning standards require performance testing?

This best practice guide is PV System Commissioning or re-Commissioning Guide Supplement to characterize and maximize PV system performance. If a PV system is commissioned using industry standards, then it should produce as much energy as was expected, right?

No, PV industry commissioning standards do not call for performance testing.

What are the requirements to install a PV system?

Installing a PV system requires adherence to building, electrical, and fire codes and product standards. The regulations governing PV systems are in place to ensure the structural integrity of the building and its suitability for installation of a PV system.

Are all items outlined in this section relevant to a PV system?

Not all items outlined in this section are relevant to each PV system. This inspection reference details most of the issues that relate to the PV system during the inspection process. All California Electrical Code (CEC), California Residential Code (CRC), California Building Code (CBC) and California Fire Code (CFC) references are noted.

What do you need to know about a PV system?

PV system markings, labels and signs according to the approved plan. Connection of the PV system to the grounding electrode system according to the approved plan. Access and working space for operation and maintenance of PV equipment such as inverters, disconnecting means and panelboards (not

required for PV modules) (CEC 110.26).

What is a quality control inspection for solar PV?

This inspection covers visual inspection, quantity verification, field testing and measurements, and certification checks such as IEC, UL, and CE marking. These inspections can be performed at various stages, including: Apart from our quality control inspections for solar PV, we provide a variety of vendor assessment services.
