## Overview

---

What is a roof mounted photovoltaic system guidance?

The guidance refers only to the mechanical installation of roof mounted integrated and stand-off photovoltaic systems; it provides best practice guidance on installation requirements and does not constitute fixing instructions.

What is the practical guide – solar photovoltaic systems?

By including reference to health and safety, Wiring Regulations, British and Harmonised standards and industry guidance the Practical Guide: Solar Photovoltaic Systems brings all the renewable installer requirements together in one publication.

What is the best practice manual for rooftop solar photovoltaic systems?

5.11.1 Solar Energy UK have produced an O&M document, Industry best practice manual 2.0: Guidelines for the operation and maintenance of rooftop solar photovoltaic systems. This provides a comprehensive guide to best practice in terms of maintenance in the context of rooftop systems.

What guidance is there on the performance of PV systems?

The Good Practice Guide provides some guidance on the performance of PV systems in Section 4 of the updated PV Installers Guide. The PV Specialist should model the system using one of the software simulation programmes available, which have a 'library' of modules and inverters and can select the sunlight conditions most representative of the site.

Are there any UK standards relating to a PV installation?

While many UK standards apply in general terms, at the time of writing there is still relatively little which specifically relates to a PV installation. However, there are two documents which specifically relate to the installation of these systems that are of particular relevance:.

What are the IEC standards for photovoltaic systems?

The IEC also manages global conformity assessment systems that certify whether equipment, systems, or components conform to its international standards. In 2016 and 2020, IEC published two key associated standards: BS EN IEC 62446-1:2016 Photovoltaic (PV) systems – Requirements for testing, documentation and maintenance.
