

# Photovoltaic panel installation work plan example

## Overview

---

Should a general contractor install a solar PV system?

A general contractor may face a choice between using an electrical subcontractor or a solar subcontractor to install the PV system. A good solar contractor will have the expertise in solar PV systems plus qualified electricians on staff.

What is included in a residential solar PV plan set?

They typically include roof layouts, load calculations, equipment specifications, and electrical wiring diagrams. Also, residential solar PV plan sets must follow residential building codes and solar permit regulations for a given area, which may differ from commercial and utility-scale solar installation requirements.

How should a PV system be designed & installed?

From the outset, the designer and installer of a PV system must consider the potential hazards carefully, and systematically devise methods to minimise the risks. This will include both mitigating potential hazards present during and after the installation phase.

What is a scope of work for a solar PV system?

The scope of work describes the details of the solar PV system and what the contractor will be expected to provide in their role in the project. The RFP template in this guide provides a comprehensive system description, but your scope of work also is important because it contains specific and unique details about the project.

What is included in a photovoltaic work package?

In general, each developer determines the degree of detail for themselves – theoretically, the work package can include work up to the installation of individual photovoltaic modules with detailed planning of all operations, for

example, the installation of bolts and tightening nuts.

What do I need to do before installing solar panels?

For example, before installing the solar panels, you may need to complete tasks such as securing the mounting system and wiring the electrical components. Use dependencies in ClickUp to visually map out the order in which tasks need to be completed.
