## Overview

---

Can a storage battery work without solar panels?

Yes, a storage battery can absolutely work without solar panels, which means you can still enjoy all the benefits of solar power. Additionally, a storage battery can store electricity from the grid, which is a great way to save money if you're on a time-of-use tariff.

Should you combine battery storage with solar panels?

We recommend combining battery storage with solar panels for this very reason. Getting solar panels means you can charge your battery for free whenever the sun is up. You can then rely on your battery when your solar panels can't generate enough electricity, such as on seriously cloudy days or at night.

Can solar inverters work without batteries?

Solar inverters can function without batteries, converting solar panel energy for immediate use or grid export. Choosing an appropriate inverter and monitoring energy usage are essential in a battery-less solar system. Without batteries, there is no energy storage for use during outages or when solar production ceases.

Is it worth getting a solar storage battery?

A solar battery allows you to store electricity produced by your solar panels and use it later or, in some cases, sell it back to the grid to make a few quid – but they're not cheap. Read on to see if it's worth getting a solar storage battery for your home. This is the first incarnation of this guide.

Do you need solar panels for home battery storage?

Whether you want to be greener, save on energy bills, or have a backup power plan, home battery storage is a big deal. Having a home battery means you can save extra electricity when it's cheaper, like at night, and use it later

when energy costs more or during a blackout. And guess what?

You don't even need solar panels to make this work.

Do solar batteries work with solar panels?

Solar batteries are designed to work with solar panel systems. It's a device that stores the electricity you generate (but don't use immediately) from your solar panels, allowing you to then use that electricity later in the day.
