

Photovoltaic panel upgrade

Overview

Should you upgrade or replace your solar panels?

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades.

Should you apply for a solar panel grant?

By applying for a solar panel grant, you could receive heavily discounted or even free solar panels, resulting in annual energy bill savings upwards of £1,040. We recently conducted a survey of over 1,540 Independent readers who own solar panels* to understand how they made the most of the solar panel funding available to them.

Why should you upgrade your solar panels?

Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades. With improved efficiency, newer solar panels can result in decreased electricity bills.

Who is eligible for solar PV panels?

To be eligible for solar PV panels, your home needs to meet these specific requirements: Have an income of less than £31,000. Currently have an inefficient heating system within the D-G energy efficiency band. Own your home and live in it, or live in private rented accommodation (requires permission from the landlord).

Are there free solar panel grants in the UK?

*Available solar panel grants in the UK as of April 2024 While some of the government initiatives are completely free solar panel grants, others are loans

or reductions in VAT that count as solar panel government schemes. The application process and eligibility criteria for each of these are different, so let's go over each policy.

Should you upgrade your solar system?

Well, perhaps it's time to think about upgrading your existing solar system for something much more modern and efficient. This could see you make massive savings in regards to your future power bills. Before you decide on how to upgrade your solar system, it's worth running a few checks beforehand to make sure you make the right changes.
