

Photovoltaic panel waterproofing strip

Overview

What is GSE bottom waterproofing strip?

GSE Bottom Waterproofing strip - Flex. This flexible sealing strip can be used to provide a continuous waterproof border along the bottom edge of the PV array. It can also be used for the top edge of the array instead of upper flashing components. Easily malleable for various applications Pre bent to facilitate folding and alignment.

What is GSE flexalu waterproof flashing strip 330mm x 5m?

GSE Flexalu Waterproof Flashing Strip 330mm X 5M. GSE brings expert European design and production capabilities to create systems that make solar arrays possible on any building. As a cost-effective system that replaces traditional tiles or slates, GSE represents a very attractive solution for integrating solar into any rooftop.

Which flexalu waterproofing strip should I use?

Log in or register for trade discounts! BUY! The 500 mm Flexalu waterproofing strip should be utilised with all tiling types other than slate when used in tandem with the GSE in-roof-mounting equipment. For slate roofing and for direct to gutter connection the 330 mm version should be used.

What is a flexible sealing strip used for?

This flexible sealing strip can be used to provide a continuous waterproof border along the bottom edge of the PV array. It can also be used for the top edge of the array instead of upper flashing components. Easily malleable for various applications Pre bent to facilitate folding and alignment Ease of use thanks to its low weight
