

# **Photovoltaic panels are installed without leaking**

## Overview

---

### Can solar panels cause leaks?

The weight of the solar panels can cause stress on the roof, especially if the roof is already weakened or damaged. If the solar panels are not installed at the correct angle, water can pool on top of them and potentially cause leaks. In this article, we will share ways to reduce the risk of leaks, both before and after a solar panel installation.

### Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak?

There are various reasons your roof could leak after installing solar panels.

### What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

### Can solar panels be installed on a combustible roof?

In general terms, solar panels should not be installed on combustible roofs unless some form of fire protection can be installed between the panels and the roof e.g. concrete panels or pebble ballast. 3. Location of solar panels.

### Can a solar installation cause leaks on a tin roof?

A solar installation can cause leaks on a tin roof if proper installation procedures are not followed. Some common causes of leaks on a tin roof after

a solar installation are: Improper sealing: When mounting brackets are attached to a tin roof, holes need to be drilled into the roof.

Are solar panels dangerous?

From fire damage to leaking roofs, solar panel installations come with their fair share of challenges. To understand the risks in more detail, check out our article on the challenges and risks of solar panels. 2. Is your roof suitable for Solar panels?
