

Photovoltaic panels packaged and sent by express

Overview

Can I ship a solar panel on a pallet?

Shipping a solar panel on a pallet is the cheapest and most efficient solution, as this service allows you to ship several solar panels at once. However, it is also possible to ship a single solar panel through our Express Service if you need an urgent delivery or through the Van Delivery Service if you require an entire vehicle.

How to transport solar panels?

To transport solar panels, you can book shipping through Eurosender. They offer the right solution for organising the best shipping service to the desired destination. Many were wondering how to pack and transport solar panels.

What are solar panels and kits?

Solar panels and kits are systems that generate and supply electricity by capturing light energy called photons from the sun. They don't require direct sunlight to work and will still create electricity on a cloudy or dull day. Our high quality solar panels and kits are ideal for use in Caravans, Boats, and Motorhomes and come ready to fit.

How do I protect my solar panels from damage during shipping?

To protect solar panels during shipping, follow these instructions: Inspect the solar panel before shipping for any obvious damage. During packing, place the sunny side (front side) facing the pallet. Add foam pads around the frame of the solar panel. Have the last solar panel sunny side up. Lastly, add edge protectors.

Can Viridian solar panels be installed on a slate roof?

Panels in the M10 range boast a clean, low-profile design and can be installed easily with the Viridian mounting kits. The panels are compatible with a wide range of slate and tile roofs. Solar Panels are subject to a £150 ex VAT

delivery charge up to 16 panels. This is due to being transported by pallet. This can take up to 48 hours.

Photovoltaic panels packaged and sent by express

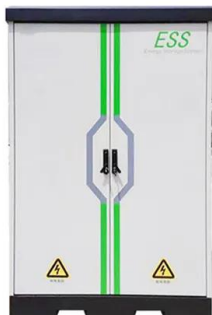

Solar explained Photovoltaics and electricity

About 74 billion kWh (or 73,619,000 MWh) were generated by small-scale, grid-connected PV systems in 2023, up from 11 billion kWh (or 11,233,000 MWh) in 2014. Small ...
