

Photovoltaic paphos

Overview

What is a commercial photovoltaic system in Cyprus?

Commercial photovoltaic systems in Cyprus are usually used by businesses for self-consumption. That is, the energy generated by the solar panels is solely used for the building where the panels are installed.

Does green air install solar panels in Paphos?

At Green Air, we take on any installation of solar panels in Paphos area. One of our solar panels installation in private apartments in Paphos – See more projects here [What is exactly solar energy?](#)

.

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

Should you invest in solar panels in Paphos?

All done by simply investing in solar panels in Paphos. The initial investment costs seem to off-put many, but installing solar panels is a long-term investment that is going to pay off for the years to come. You can also apply for subsidy programs that can reduce this cost significantly.

How to install solar panels in Paphos area?

At Green Air, we undertake this task by applying for your project of installing solar panels in Paphos area. Applicants will need to pay the application fee. The net metering agreement is signed after receiving DSO approval.

Who is eligible for a photovoltaic system in Cyprus?

Anyone with Cyprus permanent residency is eligible for a photovoltaic system in Cyprus, given that the property they want the panels to be installed on is interconnected with the EAC network and it was built according to the regulations of the Department of Town Planning and Housing.
