

# Planet research for kids

## Overview

---

What is National Geographic Kids' Space?

Using our National Geographic Kids' Space primary resource sheet, pupils will learn fascinating facts about the solar system by taking a journey to the different planets orbiting the Sun.

What is a planet in astrology?

What is a Planet?

The planets in our solar system are shown from top to bottom: Mercury, Venus, Earth (and our moon), Mars, Jupiter, Saturn, Uranus, and Neptune.  
What is a Planet?

.

What should children learn about the Sun?

Pupils should be taught to: Pupils should learn that the Sun is a star at the centre of our solar system and that it has eight planets: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune (Pluto was reclassified as a 'dwarf planet' in 2006).

Which planets have a surface?

In the third place are the terrestrial planets. Though they are the smallest, these planets are the only ones that have a surface. In order of size, they are Earth, Venus, Mars, and Mercury. A couple of years ago, Pluto was also considered a planet and was the ninth planet of the Solar System. However, Pluto is now considered a dwarf planet.

What is the biggest planet in the Solar System?

The gas giants are the biggest planets in the solar system. Jupiter has a mean radius of 69.911 kilometers / 43.440 miles, a diameter at the equator of

around 142.984 km / 88.846 mi, and a diameter at the poles of 133.708 km / 83.082 mi. It is the biggest planet in the Solar System. Compared to Earth, it has more than 11 times its diameter.

What are the three conditions for planethood?

They put their heads together in 2006 and came up with three conditions for planethood: A planet must orbit the sun, be large enough so that its own gravity molds it into a spherical shape, and it must have an orbit free of other small objects. Unfortunately for Pluto, our one-time “ninth planet” failed to meet the third condition.

### Earth Facts for Kids

The Earth is the largest of the terrestrial planets at 3,959 mi/6,371 km radius, and the fifth largest overall planet in our solar system. Earth is an average distance of 93 million mi/150 million km from the sun or one AU (astronomical unit).

### StarChild: A Learning Center for Young Astronomers

StarChild is a learning center for young astronomers ages 5-13 to learn about the solar system, the Milky Way galaxy, and the universe beyond. Use the links above to ...

### Planets Research Fact Writing Activity for 3rd-5th Grade

Encourage your learners to research and record important facts about each planet using these Planet Fact Sheets. Children will record the order of the planet, color, number of moons, and three important facts. Why not equip children with

different information about different planets?  
They will then have to go around the classroom,  
interviewing each other to ...

[Solar System Primary Resource](#)

This Science primary resource introduces children to the solar system. Discover the planets, stars, moons, comets and dwarf planets of our solar system. What's the largest planet? Why does Uranus spin on its side? Which planet has a ...

**Saturn Facts for Kids , Interesting, Fun, Information & History**

Saturn is the sixth planet from the Sun, and the second largest of the nine planets. Click for even more facts and information. Looking for fun activities to teach kids about the planet Saturn? This premium worksheet bundle contains a printable fact file and 10 fun and

[Planet Facts Worksheet/Worksheet \(teacher made\)](#)

Use this space based worksheet for year 1 and year 2 children to research facts about each of the planets of the solar system. There is a challenge instruction sheet included alongside writing templates for all of the Solar System's planets. As well as being a fun activity to keep them occupied, it's a great way to test their research and investigation skills.

### Solar System Exploration

The solar system has one star, eight planets, five dwarf planets, at least 290 moons, more than 1.3 million asteroids, and about 3,900 comets. We mean waaaay out there in our solar system - where the forecast might not be quite what you think. Let's look at the

### Planets Research and Design Your Own Planet Printable Pack

Whether they are assigned a planet to research or choose their own, kids can fill in lots of planet facts. The second page is the Design Your Own Planet page. This is where kids can really let their creative juices flow! They will get to design every aspect of their
