

Planet viewing

Overview

What is a live view of the Solar System?

Check out all of the missions transmitting data to Earth, live. This simulated live view of the solar system allows you to explore the planets, their moons, asteroids, comets and the spacecraft interacting with them in 3D.

What is a simulated live view of the Solar System?

This simulated live view of the solar system allows you to explore the planets, their moons, asteroids, comets and the spacecraft interacting with them in 3D. You can also fast-forward or rewind time, and explore the solar system as it looked from 1950 to 2050, complete with past and future NASA missions.

Which planets are currently visible?

See which planets are currently visible, along with their rise and set times, to help you plan your observations. Jupiter presents a captivating view with its prominent cloud bands, the iconic Great Red Spot, and up to four of its largest moons: Io, Europa, Ganymede, and Callisto.

Can you visit all exoplanets?

You can visit every exoplanet ever discovered and ride along with the spacecraft that found them. The app is constantly updated for the latest discoveries, and you can visit any system, compare it to our solar system, and see if any of the planets reside in the "habitable zone", indicating a possibility of life.

What can you see tonight's Celestial Wonders?

Tonight's celestial wonders are ready to amaze and inspire. Here's a brief list of what you can explore: Explore sunspots, flares, and prominences, revealing solar dynamics and activity. For safe observation, use solar filters or telescopes to protect your eyes.

How do I cancel a planetarium view?

Point the horizon. Point your phone roughly towards the horizon, hold that position and then click Next. Cancel<BackNext > Step 3. Point about 45° above the horizon. Now point your phone roughly 45° above horizon, hold that position and then click Finish. Cancel<BackFinish Share this Planetarium View

Planet viewing

[Stellarium Astronomy Software](#)

Stellarium is a planetarium software that shows exactly what you see when you look up at the stars. It's easy to use, and free. features sky default catalogue of over 600,000 stars extra catalogues with more than 177 million stars default catalogue of over 80,000

Sky Tonight: Planets, Stars & Spacecraft Over Your Location

Discover celestial objects visible tonight from your current location. Our guide automatically shows planets, stars, nebulae, and spacecraft flyovers you can see right now. Explore the night sky with up-to-date data specific to where you are!

The Planets Today : A live view of the solar system

The planets today shows you where the planets are now as a live display - a free online orrery. In this solar system map you can see the planetary positions from 3000 BCE to 3000 CE, and also see when each planet is in retrograde.

ViewSpace

ViewSpace gives you the opportunity to explore our planet, solar system, galaxy, and universe. Provided free with the support of NASA, ViewSpace is developed by a team of scientists, educators, and communication specialists who ...

Planet View

Planet View displays a beautiful satellite image from Planet every time you open a new tab. This extension replaces the "New Tab" page in Chrome with an image from the Planet gallery. Follow the link from the image title in the lower left to learn more about the

Eyes

This simulated live view of the solar system allows you to explore the planets, their moons, asteroids, comets and the spacecraft interacting with them in 3D. You can also fast-forward or rewind time, and explore the solar system as it ...

5 Best Telescope Eyepieces for Viewing Planets (Read This First!)

This site contains affiliate links to products. I may receive a commission for purchases made through these links. For exploring high-powered views of different planets, you'll need multiple eyepieces to complement your telescope's work. To view planets, you must consider eyepieces that maximize resolution, contrast, and details. The five best telescope eyepieces for viewing ...

12 Best Telescopes for Viewing Planets and Galaxies [2024]

The best telescope for viewing planets and galaxies comes with at least a 120mm aperture (astronomical sweet spot) and a 1,000mm focal length (preferably higher if your aperture is higher too). Best value/price ratio Sky-Watcher 10

NASA Worldview

The NASA Worldview app provides a satellite's perspective of the planet as it looks today and as it has in the past through daily satellite images. Worldview is part of NASA's Earth Science Data and Information System. ESDIS makes the agency's large repository of data accessible and freely available to the public.

How to Build Underwater Viewing in Planet Zoo

Learn how to create the ultimate underwater viewing experience in Planet Zoo! Follow these simple steps to build a stunning glass barrier and add water for t Learn how to create the ultimate

3D Model: Solar System

3D model of our solar system with scaled relative speed of orbit of each planet and trivia about them. Built with HTML, CSS and JavaScript. Note: Images of planets used are enhanced images from the web and may not look exactly as seen through space

Sky Tonight: Planets, Stars & Spacecraft Over Your Location

Discover celestial objects visible tonight from your current location. Our guide automatically shows planets, stars, nebulae, and spacecraft flyovers you can see right now. Explore the night sky ...

A Complete Guide to the Solar System and the Night Sky

TheSkyLive offers comprehensive information about the most interesting celestial objects, and a set of tools designed to support the exploration and observation activities for ...

Universe Sandbox

The space tracker you can take anywhere. Track noteworthy space objects in your browser in a 3D simulation of the solar system Explore the Solar System to your heart's content. Solar System Sandbox 3D Web App Hint: Add objects by using the Search bar in

[5 Best Telescopes For Viewing Planets](#)

Tips for Viewing the Planets Much can be said when it comes to viewing planets, but since we only have so much time, here are some basic tips to research on your own and practice. Atmospheric Conditions Where you observe matters and sometimes it's not

The Best Telescopes for Viewing Planets: Expert Picks for Stellar

The Best Telescopes for Viewing Planets - Observing the night sky and its celestial wonders is a pursuit that has captivated humanity for millennia. Today, Conversely, reflector telescopes, which use mirrors instead of lenses, are typically more affordable and offer larger apertures, allowing for better viewing of dimmer objects like distant galaxies and nebulae.

Solar System Scope

Online 3D simulation of the Solar System and night sky in real-time - the Sun, planets, dwarf planets, comets, stars and constellations Contact us: contact@solarsystemscope Facebook Newsletter Embed Account

Easily Identify Stars At Night , Mobile Stargazing , Essential ...

Many couples enjoy stargazing on date night, but they may not know what they're looking at. Star Walk 2 makes the experience of observing the night sky together much more informative. The astronomy app provides real-time data about the planets, stars, and

WORKING PRINCIPLE

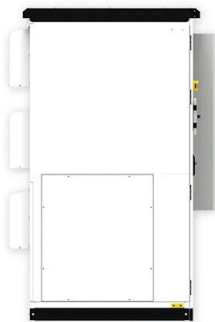

3D Interactive Globe

Explore the Earth with the 3D interactive globe. Latest high-resolution 3D satellite imagery. The globe is a three-dimensional model of the Earth. The globe has 3 properties: Equivalence - the scale on all sides of the globe is the same. Equivalence - the proportions

Zoom Earth , Live Weather Map & Hurricane Tracker

Interactive world weather map. Track hurricanes, cyclones, storms. View LIVE satellite images, rain radar, forecast maps of wind, temperature for your location. Mobile App Download the Zoom Earth app! Scan the QR code with the camera on your mobile device to get the Zoom Earth app.

[Best Telescope Eyepiece for Viewing Planets](#)

The Meade Series 5000 HD-60 eyepieces are designed for high-definition planetary observation, providing crisp, clear views of planets and their details. They come in a range of focal lengths, providing magnifications of ...

A Complete Guide to the Solar System and the Night Sky

2 ???· TheSkyLive offers comprehensive information about the most interesting celestial objects, and a set of tools designed to support the exploration and observation activities for astronomy enthusiasts at every skill levels The ZHR value refers to the Zenithal Hourly Rate, i.e. the average number of meteors an individual observer could see in an hour, assuming ...

Solar System Exploration

The solar system has one star, eight planets, five dwarf planets, at least 290 moons, more than 1.3 million asteroids, and about 3,900 comets. We mean waaaay out there in our solar system - where the forecast might not be quite what you think. Let's look at the

[The Sky Tonight](#), [TheSkyLive](#)

Tonight Timeline This observing guide helps you plan your Solar System observations. It's divided into three sections, detailing visible objects for post-sunset, nighttime and pre-sunrise viewing. Only objects reaching at least 15 altitude and set/rise at least 15 minutes

Best Telescope for Seeing Planets: An Ultimate Guide to Making ...

An F/10 focal ratio or greater is fine for viewing planets. Here is a list of some of the best telescopes for seeing planets: One popular choice is the Celestron NexStar 8SE. This telescope offers a large aperture and excellent optics, allowing for clear and detailed

Best Telescopes for Viewing Planets & Galaxies in 2024

And although I could view planets like Saturn beautifully, the 40x magnification limit meant that viewing distant galaxies was a bit less awe-inspiring. However, for a starter telescope, it's a small compromise for an ...
