Are there other portable power stations worth considering?

.

Why do you need a portable power station?

A portable power station provides an easy way to bring instant power to a range of devices wherever you are. Whether you're camping in the great outdoors or spending a little time working off-grid, portable power stations will ensure your gadgets and tools never run out of juice.

What accessories do you need for a portable power station?

One of the most common accessories is going to be a cord to connect to similar power stations in series, often times doubling your power output. Some portable power stations have a light bar built into the housing, which is useful for seeing at night. Anker's Solix C800 Plus also includes extendable camping lights.

How much power does a portable power station need?

Large devices like TVs and mini fridges will require a power station with a capacity of 400 - 500 Wh. Bear in mind that these are often heavier. Models with a three pin AC power outlet will allow you to plug in a variety of devices. Take note of how your portable power station can be charged.

Are solar power stations rechargeable?

Many times, solar portable power stations are also rechargeable via AC power,

serving as a rechargeable generator of sorts. Electric power stations, also known as portable electric generators, operate like a large battery. Simply plug the portable power station into a wall outlet and it charges quickly.

How do you charge a portable power station?
