Power rack attachments are smaller components meant to be affixed to a squat rack to maximize the exercises you can do with your rack. Attachments can provide a variety of uses to expand the possibilities of using the rack. A rack attachment can be simple, like adding a dip bar to an upright, or complex, like the cable.

To answer this question, first ask yourself: What do I want to do that I can't already?

That's going to help you narrow down your search. If you're just looking to do dips, most rack manufacturers carry some sort of dip bar station that easily hitch pins into the upright, such as the.

This can be a safety issue and also may void warranties. Personally I've used a Rogue Monster Lite(3-by-3-inch, $\frac{5}{8}$ -inch holes) dip attachment on a Rogue Monster Rack that has just 1-inch holes, and while it was a little more shaky coming on and off, it felt okay in use. That.

The main components that determine compatibility are tube dimensions - meaning the width and depth of the uprights on the rack - and hole sizing. If the attachment is designed.
