

Power system s822

Overview

What is IBM POWER system S822 (8284-22a)?

The IBM® Power® System S822 (8284-22A) is based on POWER8® processor-based technology. Use this information to find the system overview and the planning, installing, removing, replacing, configuring, and troubleshooting procedures.

What is a power S822 server?

The Power S822 server for existing customers is designed to put data to work. With a strong commitment to optimizing AIX, and IBM i workloads, this system delivers better performance than the prior generation of systems and offers unmatched price and performance value for integrated Linux applications.

What is IBM POWER system S822LC for high performance computing (HPC)?

The IBM Power System S822LC for High Performance Computing (HPC) server (8335-GTB), the first Power Systems offering with NVIDIA NVLink Technology, removes GPU computing bottlenecks by employing the high-bandwidth and low-latency NVLink interface from CPU to GPU and GPU to GPU.

How does POWER8 work on a power S822?

Because of that, POWER8 allows more threads per core to run concurrently, increasing the total throughput of the processor and of the system. On the Power S822, each POWER8 module has two memory controllers, each connected to four memory channels. Each memory channel operates at 1600 MHz and connects to a DIMM.

What is IBM redpaper S822 (8284-22a)?

Chapter 2. Architecture and technical overview Chapter 3. Virtualization Chapter 4. Reliability, availability, and serviceability This IBM® Redpaper™ publication is a comprehensive guide covering the IBM Power System S822 (8284-22A) server that supports the IBM AIX® and Linux operating systems

(OSes) running on bare metal.

What is a DC-powered IBM POWER® system S822(8284-22a) server?

The dc-powered system employs an isolated DC return (DC-I) design. The DC battery return terminal shall not be connected to the chassis or frame ground. GR-1089-CORE. These instructions will help you install, cable, and set up your IBM Power® System S822 (8284-22A) server.
