

Powering progress

Overview

Why is powering progress important?

Powering Progress generates value for our shareholders. It provides the financial strength to transform our company as the world makes the transition to cleaner energy. Powering Progress focuses on working with our customers and across sectors to accelerate the transition to net-zero emissions, in step with society.

What is powering progress?

Powering Progress also means respecting nature by protecting the environment, reducing waste and making a positive contribution to biodiversity. Powering Progress is underpinned by our core values of honesty, integrity and respect for people and our focus on safety. This includes our commitment to doing business in an ethical and transparent way.

What are the new targets and commitments under powering progress?

New targets and commitments under Powering Progress include: Working with our customers and across sectors to accelerate the transition to net-zero emissions. Our climate target is to become a net-zero emissions energy business by 2050, in step with society's progress in achieving the goal of the UN Paris Agreement on climate change.

How do we measure our progress?

As another way to measure our progress, we have set short-, medium- and long-term targets to reduce the net carbon intensity of the energy products we sell. Net carbon intensity 3 measures emissions associated with each unit of energy we sell.

What is powering lives?

Powering lives through our products and activities, and by supporting an inclusive society. Our ambition, by 2030, is to provide reliable electricity to

100 million people in emerging markets who do not yet have it.

How do we power lives?

We power lives by providing the vital energy people need, championing inclusion and contributing to local communities. Powering Progress means respecting nature by protecting the environment, reducing waste and making a positive contribution to biodiversity. See examples of how we are delivering on our strategy.
