

Powerup power systems

Overview

What is powerup energy technologies?

PowerUP Energy Technologies mission is to improve sustainability and reliability of the energy systems. With a vision for a cleaner tomorrow, PowerUP develops and manufactures high-quality, sustainable energy generation products. Boasting 20 years of experience in fuel cell technology, we stand as an innovator in the fuel cell technology market.

Who is powerup?

PowerUp is the dealer who is knowledgeable and dedicated to generator sales and service to provide the backup power needed. Commercial generator systems are available to run on natural gas, propane or diesel and start within seconds after the power goes out. We also provide remote generator monitoring services as well.

What is a powerup traffic system?

PowerUp Traffic System is a natural gas powered generator system that is designed to supply backup power to stoplight intersections and railroad crossing gates. It features a 6 kW brush-less commercial generator. It will supply power to any location that needs 50 amps or less of backup power. The premise is simple.

What services does powerup offer?

PowerUp's residential services range from installation of new light fixtures, wiring, re-wiring, expanding service capacity to damage repair. We understand that your home and belongings are important and you can trust us to complete our work with care, skill and professionalism.

Is the powerup mobile generator system rated for continuous service?

The POWERUP Mobile Generator System is rated for continuous service at the load specified 50 amps. The system is built as a system, tested as a system,

and certified as a system to test its full power rating, stability, voltage, and frequency regulation.

What is the powerup program?

The PowerUp Program is offered to women interested in exploring entrepreneurship. Information on this program is found here: [YWCA Metro Vancouver](#) is a registered charity, gender equity advocate and community service provider.
