

Price of a solar panel system

Overview

According to our solar experts, solar panels cost about \$19,000 to install in the United States, on average. While the price tag seems steep, incentives and payment options help make the cost of going solar easier to manage. How much does a solar system cost?

Most people will need to spend between \$16,500 and \$21,000 for solar panels, with the national average solar installation costing about \$19,000. Most of the time, you'll see solar system costs listed as the cost per watt of solar installed so you can easily compare prices between quotes for different system sizes.

How much does a solar panel installation cost?

The average cost of a 10.8 kW solar panel installation on EnergySage is \$20,948 after federal tax credits. You'll probably save anywhere from \$28,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much do solar panels cost per watt?

The average cost per watt for solar panels in the U.S. is \$2.84 for residential systems. High-efficiency monocrystalline panels tend to be at the higher end of the price range, but they generate more power with fewer panels—ideal if you have limited roof space.

How much does a solar panel cost in Massachusetts?

Solar panel pricing is the most expensive in Massachusetts, where estimated costs are around \$18,900 after the tax credit. What Impacts Solar Panel Cost?

There are many factors that impact the overall cost of your solar system.

Do solar panels cost more?

The more solar panels you install, the more expensive your system will be.

The ideal system size for your home depends on personal factors like your roof size and angle, energy usage and location. Ultimately, solar system size depends on your household's energy consumption and how much energy you want to generate with your panels.

How much does a 6kW Solar System cost?

The average cost for monocrystalline solar panels is \$1 to \$1.50 per watt. Therefore, a standard 6kW system costs between \$6,000 and \$9,000.

Polycrystalline: Polycrystalline panels are a more cost-effective option up front.

A 4kW solar panel system is suitable for the average home in the UK and costs around £5,000 - £6,000. The estimated average yearly savings you can expect with a solar panel system range from £440 to £1,005. If you install a 4kW solar ...

What's a Good Price for Rooftop Solar in 2024?

For context, residential solar panels are typically rated between 350 and 400 watts each, and the average rooftop solar system is around 7,000 watts (7 kilowatts). The price per watt of a solar project includes both "hard costs" like panels, inverters, and racking and "soft costs" like labor, permitting, interconnection, customer acquisition, and general overhead.

How Much Does Solar Installation Cost? Price Guide for 2024

Price Per Watt The total cost of solar panels, including installation, typically ranges from \$2.40 to \$3.60 per watt. For an average \$18,150 solar panel system, this tax credit results in approximately \$5,400 in savings, lowering your final price to about \$12,700.

[Your Guide To Home Solar In 2024](#)

Once reserved for climate-conscious homeowners willing to shell out a pretty penny, solar panels now cover the rooftops of millions of U.S. homes. Why'd they become so popular? They're good for the planet--and they're good for your wallet. The cost of solar has come down significantly over the past decade, while electricity prices have skyrocketed.

Solar panel cost in 2024: It may be lower than you think

The panels themselves are probably the first thing that comes to mind when you think about going solar, but solar panels represent less than a third of the total solar equipment costs. You can expect all required solar equipment, including supply chain costs and sales tax, to cost \$13,800--about 46% of the total system price.
