

# Progress in photovoltaics journal abbreviation

## System Topology

## Overview

---

Progress in Photovoltaics is a monthly covering research on . It is published by and the is (). According to the , the journal has a 2020 of 7.953, ranking it 17th out of 114 journals in "Energy & Fuels", 21st out of 160 journals in "Physics Applied", and 59th out of 336 journals in "Materials Science Multidisciplinary".

What is progress in photovoltaics?

Progress in Photovoltaics: Research and Applications is a leading journal in the field of solar energy, focused on research that reports substantial progress in efficiency, energy yield and reliability of solar cells. It aims to reach all interested professionals, researchers, and energy policy-makers.

What are the criterion for submitting a paper in photovoltaics?

Our key criterion is that the papers we publish reflect substantial advancement in the field of photovoltaics. True to the journal's title, the key criterion is that submitted papers should report substantial "progress" in photovoltaics. The full Aims and Scope of Progress in Photovoltaics can be found on the Overview page.

Should prog photovolt be cited under ISO 4 standards?

In conclusion, under ISO 4 standards, the Progress in Photovoltaics: Research and Applications should be cited as Prog Photovolt for abstracting, indexing and referencing purposes. When you refer to a reading list or a series of references, you might notice that journal titles are sometimes abbreviated.

Where can I find the best research papers in photovoltaics?

Through the collaboration, the best research papers from the event will be published in Progress in Photovoltaics, as well as in Solar RRL and Advanced Energy and Sustainability Research, the high-impact, international journals for the latest research in photovoltaic technology, from original research to practical application.

What should I consider when submitting a contribution to progress in

photovoltaics?

Prospective authors are encouraged to consider the degree to which their contributions report significant progress in the field and to consider other means of publication for those not meeting the high standard required by Progress in Photovoltaics.
