

# **Puget sound energy solar power**

## Overview

---

How many people are going solar in Puget Sound?

In the past few years, more than 5,500 Puget Sound Energy customers have installed their own solar-energy systems. And the number of people going solar continues to grow. It's not just our region's long and sunny summer days that suit the generation of solar-powered electricity.

Is solar power a bright future for Western Washington?

Though we see plenty of rain and clouds here in Western Washington, solar power promises a bright future for our region. In the past few years, more than 5,500 Puget Sound Energy customers have installed their own solar-energy systems. And the number of people going solar continues to grow.

Does the Pacific Northwest have solar energy?

Check the FAQs for the Solar Choice program. Even though the Puget Sound region is known for cool, gray days, solar energy in the Pacific Northwest has a lot of potential. That's because the power comes from light, not heat. And it's catching on! In 2015, Washington's installed capacity for solar grew by 85 percent over the previous year.

Does PSE offer solar?

Still interested in Solar?

PSE has a range of solar options designed to help you meet your unique clean energy goals. No contracts or installation. Green Power and Community Solar are solar programs with no need to install or maintain equipment for renters and homeowners. Install your own solar.

How does PSE metering work?

The renewable energy you send back to the grid is credited against your usage, so you only pay for the net amount of energy that PSE provides plus

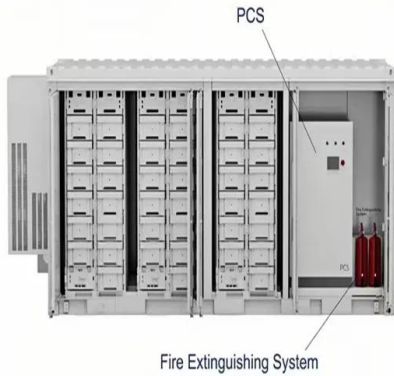

your basic monthly charge. If you produce more energy than you use within a given bill period, PSE banks the extra net metering credit.

What is customer connected solar?

Solar is one of the most common ways our customers choose to generate their own energy. Our Customer Connected Solar program can help with information and resources to learn more about installing solar at your home and how to apply for interconnection and net metering with PSE. Learn more at the links below: [Thinking about installing solar?](#)
