What questions do you ask about solar energy?

Here are some of the most frequently asked questions about solar energy we receive. What is the difference between grid-tied and off-grid solar?

What are the components that make up a solar energy system?

How long will my system last?

We've written the answers with newcomers in mind, so you don't need any prior solar background to follow along.

What questions should you ask a solar panel salesman?

Here are some of the most important questions to ask when considering solar energy installation. Before you purchase a solar panel, you will most probably engage with a solar panel salesperson. These are the top questions to ask a solar salesman. 1. How Does The Solar Panel System Work?

.

What is solar energy & how does it work?

Solar energy is the most abundant energy resource on Earth. Each day, it's harvested as electricity or heat, fueling homes, businesses, and utilities with clean, emission-free power. As the world pivots towards sustainable energy solutions, solar power is crucial in shaping our global energy landscape. But how does it work, exactly?

.

How many questions do you get a day from a solar supplier?

As a solar equipment supplier that sells direct to the public, we receive over 200 calls a day from people at every experience level, from seasoned solar

installers to homeowners exploring the possibility of going solar. Many of these calls involve frequently asked questions.

What are the different types of solar energy?

Solar energy is energy from the sun that we capture with various technologies, including solar panels. There are two main types of solar energy: photovoltaic (solar panels) and thermal. The “photovoltaic effect” is the mechanism by which solar panels harness the sun’s energy to generate electricity. What is solar energy?

.

Do solar panels cost a lot?

Ah, yes. The granddaddy of all solar energy questions. Solar panels might cost money up front, but they can slash your energy bills by more than 80% with proper usage. The average energy bill in Florida, for example, is just under \$130 per month. The average solar energy bill is between \$13 and \$40 per month. Is it Worth Installing Solar Panels?
