

Radiant reaktor brushless power system

Overview

What is a Radiant Reaktor Brushless ESC & motor?

Shop Local! The Radiant Reaktor brushless ESC and motor set a new standard for value and performance. Never before has a brushless combo been offered with this high of performance and features at this incredible value. This 3500kv system is Ideal for 2wd 1/10th scale vehicles but more than capable of powering a Helion Dominus SC and TR!.

Is the Radiant Reaktor 3500kv sensorless 1/10th scale brushless?

THE Radiant Reaktor 3500kv Sensorless 1/10th Scale Brushless System Review Intro- There are a whole lot of noobs out there that have been driving their brushed powered RTR's and have mastered the stock power system. When that happens, boredom sets in, and a new brushless system goes on the wish list. The crew over at [.].

What is Radiant Reaktor NS 35a-3500kv?

Upgrade your vehicle with a Radiant Reaktor system and feel the power! For Manuals, Parts Explosions, Spares and other Related Products. This is the Brushless Combo, NS 35A-3500kv by Radiant (RDNA0023). The Reaktor Brushless Combo is the first time such a high level of performance and features have been offered at this incredible value.

What is a Radiant Reaktor ESC?

Equipped with programmable LVC, and reverse or brake modes, this ESC was built for the beginner but engineered to last. Capable of running 2s and 3s LiPo batteries, the Reaktor system feeds your craving for more performance when you outgrow the typical included NiMH batteries. Upgrade your vehicle with a Radiant Reaktor system and feel the power!.

Is the Radiant a good Reaktor?

The Reaktor was so soft in the low end that it took a bit of getting used to for

long time brushless drivers. The upside is the super soft low end makes the Radiant exceptionally drive-able for noobs. Where as a typical non-sensored system punches you in the face off the bottom, the Radiant was quite tame.

What is Radiant Reaktor “T” Series?

- Over-temperature: Exclusive to the Radiant Reaktor “T” Series is the integrated temperature monitoring of both the ESC and the motor.
