

Raychem energy storage

Overview

Who is Raychem from TE Connectivity?

RAYCHEM TECHNOLOGY For more than 60 years, Raychem from TE Connectivity (TE) has supported the delivery of power for a wide variety of industries, applicatio.

Who is Raychem RPG?

Pioneering Excellence | Raychem RPG is a joint venture between TE Connectivity, U.S.A. and RPG Enterprises, India. Incorporated in 1989, it is one of the longest standing and most successful JVs in the country. We are committed towards providing innovative and reliable solutions to uphold critical energy infrastructure.

What is Raychem technology?

F PROVEN TECHNOLOGY Our Raychem technology is based on specially-formulated thermoplasti polymer ma olymers to create optimized solutions for various in ustry applications. The compounds for these mater als are designed, selected, and mixed in TE's own co pounding factories. Sophisticated process contro.

Why should you choose Raychem cable accessories?

The ongoing field experience makes Raychem a leader in materials science and technology for high voltage applications. The materials used in TE Connectivity Raychem cable accessories are extensively optimized with respect to product design, function, manufacturing and expected service environment. HV Heat Shrink Termination.

Are Raychem products heat shrinkable?

Raychem products offer excellent insulating and sealing performance with heat shrinkable materials. These proven materials form the basis of straight and branch joints for voltages up to 1.1 kV and designed for solid dielectric

cables (PVC/Rubber/XLPE). 1.1kV Heat Shrink Termination.

Where will PGCIL's energy storage system be installed?

The energy storage system will be installed at PGCIL's facilities in Puducherry, by ViZn's local partner firm Raychem, a joint venture between US firm TE Connectivity, and India's RPG Enterprises, which specialises in grid integration of renewables.
