

Raystech modern slavery statement solar inverters

Overview

Does the solar industry have a problem with modern slavery?

The solar industry must act urgently to address concerns about modern slavery in its supply chain, a major new research report argues. The report from the University of Nottingham's Rights Lab, 'The Energy of Freedom'?

∴

Does shifting solar panels from one country to another reduce slavery?

Government policy responses, at both federal and state level, to the modern slavery risks in renewable energy is a critical factor in the sector's ability to address this issue. Simply shifting solar panel manufacturing from one country to another does not eliminate the risks.

Should solar industry be concerned about slave labour practices?

The allegations of slave labour practices raise ethical concerns and highlight the need for transparency and responsible sourcing in the industry. The solar industry must examine its supply chain and take steps to ensure that forced labour is not present at any stage of production.

Is solar panel production linked to slave labour practices in Xinjiang?

This article examines the link between solar panel production and slave labour practices in Xinjiang, what countries are doing about it and the impact on accused solar brands. Recently, concerns have been raised about the forced labour practices in Xinjiang, China, and their connection to the solar energy industry.

Are solar panel brands linked to slave labour practices?

Recent Google search trends highlight consumers' concern about key brands linked to slave labour practices. Despite the negative publicity, some of these brands continue to grow in the solar panel market, as consumers prioritise

price and efficiency over ethical considerations.
