

# **Recommended tips for installing photovoltaic panels**

## Overview

---

Dig the trench to the appropriate depth. Pull the wires allowing for ample excess wire on each end. Pull the wires through a single piece of conduit. Work in single conduit sections and slide the conduit down the wire rather than pulling the wire through the conduit. How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

How do I choose the right solar panels?

Choosing the right solar panels can make a significant difference to the efficiency and longevity of a solar PV system. Here are a few things to consider: Efficiency rating: Panels with a higher efficiency rating will generate more electricity in less space. But they usually cost more.

How do I choose a solar PV company?

Check local planning regulations to make sure you're allowed to install a solar PV system (see above). Check that the solar PV company is MCS certified and a member of the Renewable Energy Consumer Code (RECC). Don't accept a price over the phone before the firm has visited. Get an Energy Performance Certificate for your home.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Which direction should solar panels be installed?

" Solar PV (photovoltaic) panels generate electricity from sunlight and will normally be installed on the roof of the building facing in the most south direction. The panels should also face as much south as possible. If you faced east, or west, then expect a yield of around 20% less generation annually" explains David Hilton.
