## Renewable energy production by country

---

### [Modern renewable energy generation by source](#)

Licenses: All visualizations, data, and articles produced by Our World in Data are open access under the Creative Commons BY license. You have permission to use, distribute, and reproduce these in any medium, provided the source and ...

### [Key World Energy Statistics 2020 - Analysis](#)

Notes: 2018 data. Includes electricity produced from pumped storage. Rest of the world excludes countries with no hydro IEA, World Energy Statistics, 2020; IEA, Renewables Information, 2020; IEA, Renewable Energy Market Update. Net installed capacity

### **Executive summary - Renewables 2023 - Analysis**

G20 countries account for almost 90% of global renewable power capacity today. In the accelerated case, which assumes enhanced implementation of existing policies and targets, ...

### **Renewable energy**

Renewable energy is defined as the contribution of renewables to total primary energy supply (TPES). As the trend towards the international dispersion of certain value chain activities produces challenges, discover policies to meet these

### How Electricity Is Changing, Country by Country

Renewable electricity is rising quickly, but the world's power mix remains fossil fuel-heavy -- for now. Skip to content Skip to site index Comments How Electricity Is Changing, Country by

### Electricity production from renewable sources, excluding ...

Electricity production from renewable sources, excluding hydroelectric (% of total) from The World Bank: Data Free and open access to global development data Data

### 11 countries leading the charge on renewable energy

Here are the top eleven countries using renewables--wind, electricity, geothermals--to lead the way to a low-carbon, zero emissions future. Uruguay Since 2007, Uruguay has undergone a renewable energy revolution. Back then imported fossil fuels provided more than a third of energy generation, but decades of transformation have resulted in ...

### [Renewable energy statistics 2023](#)

The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable energy statistics 2023 provides datasets on power-generation capacity for ...

### **Renewables**

Renewables play a critical role in clean energy transitions. The deployment of renewables for electricity generation, for heat production for buildings and industry, and in transport is one of the main enablers of keeping average global temperature rise below 1.5 C.

### **Global renewable energy consumption 2023, by country**

Share of renewables in global power production 2010-2023 Share of renewable power generation 2023, by region "Leading countries by renewable energy consumption worldwide in 2023 (in exajoules

### [United States: Energy Country Profile](#)

United States: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

## Non-renewable energy production share by source , Statista

Crude oil is the most produced non-renewable energy source. In 2022, crude oil accounted for a 32.9 percent share of worldwide non-renewable energy production. This was closely followed by hard

## Renewable electricity output (% of total electricity output) , Data

All Countries and Economies. Country. Most Recent Year. Most Recent Value. Renewable electricity output (% of total electricity output) from The World Bank: Data.

## Nuclear Energy

Nuclear energy and renewable technologies typically emit very little CO<sub>2</sub> per unit of energy production and are also much better than fossil fuels at limiting local air pollution. However, while some countries invest heavily in increasing their nuclear ...

## Renewable Energy

Share of electricity generated by renewables. Ember and Energy Institute. Measured as a percentage of total electricity. Source. Ember (2024); Energy Institute - Statistical Review of World Energy (2024) - with ...

## Executive summary - Renewables 2023 - Analysis

The world is on course to add more renewable capacity in the next five years than has been installed since the first commercial renewable energy power plant was built more than 100 years ago. In the main case forecast in this report, almost 3 700 GW of new renewable capacity comes online over the 2023-2028 period, driven by supportive policies in more than 130 countries.

### [List of countries by electricity production](#)

World electric generation by country and source in 2022 [1] This is a list of countries and dependencies by annual electricity production in a is the world's largest electricity producing country, followed by the United States and India. Data are for the year 2022 and

### List of countries by renewable electricity production

226 ?· This is a list of countries and dependencies by electricity generation from renewable sources each year. Renewables accounted for 28% of electric generation in 2021, consisting of hydro (55%), wind (23%), biomass (13%), solar (7%) and geothermal (1%).

### Renewable energy

Renewable energy (or green energy) is energy from renewable natural resources that are replenished on a human timescale. The most widely used renewable energy types are solar energy, wind power, and hydropower. Bioenergy and geothermal power are also significant in some countries. are also significant in some countries.

### Supply - Key World Energy Statistics 2021 - Analysis

Key World Energy Statistics 2021 - Analysis and key findings. A report by the International Energy Agency. Notes: 2019 data. Includes electricity production from pumped storage. Excludes countries with no hydro production. Sources: IEA, Renewable Energy

### List of countries by energy consumption and production

World energy consumption from 1989 to 1999. This is a list of countries by total primary energy consumption and production. 1 quadrillion BTU = 293 TW·h = 1.055 EJ 1 quadrillion BTU/yr = 1.055 EJ/yr = 293 TW·h/yr = 33.433 GW The numbers below are for the

### Electricity - Renewables 2023 - Analysis

While renewables are currently the largest energy source for electricity generation in 57 countries, mostly thanks to hydropower, these countries represent just 14% of global power demand. By 2028, 68 countries will have renewables as their main power generation source but still only account for 17% of global demand.

### Levelized cost of energy by technology

The average cost per unit of energy generated across the lifetime of a new power plant. This data is expressed in US dollars per kilowatt-hour. It is adjusted for inflation but does not account for differences in the cost of living between countries.

## Renewables - Global Energy Review 2021 - Analysis

Renewable energy use increased 3% in 2020 as demand for all other fuels declined. The primary driver was an almost 7% growth in electricity generation from renewable sources. Long-term contracts, priority access to the grid, and continuous installation of new plants underpinned renewables growth despite lower electricity demand, supply chain challenges, and construction ...

## [Electricity - Renewables 2023 - Analysis](#)

While renewables are currently the largest energy source for electricity generation in 57 countries, mostly thanks to hydropower, these countries represent just 14% of global power demand. By ...

## Energy

Energy Country Profiles Hannah Ritchie, Pablo Rosado and Max Roser Energy Access and Consumption Share of electricity production from renewables Share of electricity production from solar Share of electricity production from solar and wind Share of

## Per capita electricity generation from renewables, 2023

Renewable electricity is the sum of electricity from hydropower, solar, wind, geothermal, biomass, wave and tidal sources. The data is collected from multi-country datasets (EIA, Eurostat, Energy Institute, UN) as well as national sources (e.g China data from

### [Renewable energy statistics 2023](#)

Renewable energy statistics 2023 provides datasets on power-generation capacity for 2013-2022, actual power generation for 2013-2021 and renewable energy balances for over 150 countries and areas for 2020-2021.

### [Electricity production by source](#)

Licenses: All visualizations, data, and articles produced by Our World in Data are open access under the Creative Commons BY license. You have permission to use, distribute, and reproduce these in any medium, provided the source and authors are credited. All

### [UK renewable energy statistics 2024](#)

UK renewable energy production by country UK renewable energy statistics show that England is the UK's leading producer of renewable energy. In 2022, England produced 1.5 times more renewable
