

Requirements for adding solar photovoltaic panels

Overview

Before installing solar panels you'll need to check whether your home is suitable, and you also may need planning permission. Do solar panels need Building Regulations approval?

Building regulations approval is mandatory for solar panel installations in the UK. The approval process ensures compliance with safety, structural, and electrical standards. It verifies that the installation is carried out by competent installers and that all relevant regulations are adhered to.

Why do solar panels need building regulations?

Compliance with building regulations helps protect the integrity of the building, ensures electrical safety, and minimizes the risk of accidents or damage caused by improper installation. In the UK, the installation of solar panels is subject to both planning permission and building regulations approval.

How do I ensure compliance with building regulations for solar panel installations?

To ensure compliance with building regulations for solar panel installations, follow these essential steps: Engaging a Qualified Installer: It is crucial to engage a reputable and qualified installer who is knowledgeable about building regulations and experienced in solar panel installations.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system – so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Do I need planning permission to install solar panels?

However, make sure you follow all building regulations and apply for planning

permission if necessary, as your neighbour could report your installation to the local authority if you don't - which could result in your panels having to come down.

When will solar panels be mandatory?

In March 2024, the European Parliament approved a law requiring solar panels on all new residential buildings by 2030. The EU Solar Standard makes it mandatory for member states to gradually include solar installations in new public, commercial, and residential buildings.

Requirements for adding solar photovoltaic panels
